We have been trying to stop the spam that defaces the Guest Book since it first started appearing in January. Until now manual removal was the only practical solution. Last week we modified the Guest Book files so that all new entries must be "signed" with a unique code and then sent to a third party service for scanning prior to being posted to the Guest Book. We do not expect that these modifications will stop all spam or malicious entries, but they should result in keeping the Guest Book substantially cleaner. Please try the new process and let us know if it is too cumbersome or intimidating. We do not want to make it too difficult for our friends to use the Guest Book. Put your remarks in a Guest Book entry, or send us a Feedback form.
